

Psychological First Aid

Presented By:
Center for Safe & Resilient

What to expect?

Psychological first aid (PFA) began as a tool to help first responders cope with victims experiencing trauma on the scene. There are several models of PFA, but Psychological First Aid— TEACH (Trust, Educate, Affirm, Connect, Hope) was developed in response to a series of school shootings in the 1990s. The five-step crisis response strategy was intended to guide teachers and staff members in helping traumatized students deal with the aftermath of senseless violence. PFA—LPC helps educational staff support students through the process of recovery, especially when students encounter traumatic reminders of being in danger or of experiencing loss or trauma.

Who should attend:

Teachers, teacher's aides, administrators, office staff, support staff, anyone working with children

For training questions,

Jose Espinoza at (661) 636-4055 or jespinoza@kern.org

August 20, 2024
